

## **1. What is Neironix?**

Neironix is an analytical rating agency. Its aim is to create a rating of ICO projects and companies operating with the blockchain technology and working in the field of cryptocurrencies based on objective statistical data.

## **2. What blockchain do you use?**

Neironix uses the Ethereum blockchain for the issue of its tokens. The NRX tokens will support the ERC20 standard.

## **3. How is the Neironix solution different from its competitors?**

Neironix aggregates large amounts of data and as opposed to its competitors analyses them without human involvement or subjective judgments based on trustworthy statistical and factual indices.

## **4. Is there a bounty/airdrop campaign?**

The Neironix project has a bounty campaign. You can learn more details about the bounty campaign on ...

## **5. Is it necessary to pass KYC?**

To take part in the token sale the investor will need to register a personal account and pass KYC. An earlier passage of KYC will allow you to invest at an earlier stage of the token sale.

## **6. What is the minimal capital for participation in the token sale?**

The minimal capital for participation in the token sale is 0.1 ETH. For this value you will get 3400 NRX.

## **7. The token sale dates**

The token sale starts on September 1, 2018 at 00:00 and will continue until all tokens are sold. You can subscribe to notifications and our system will remind you of the start of the token sale.

## **8. How will the NRX token work?**

The NRX token is the access key to the platform neironix.io and the opportunity to obtain analytical data. Also, the ICO projects and other market members will be able to buy advertisement for the tokens.

## **9. The NRX token price in USD**

The NRX price is 0,001061571 ETH. The token price in USD will be calculated relatively to the ETH/USD price.

## **10. Will there be a Pre-sale?**

No, the Neironix team has decided that there will be no Pre-sale.

**11. Will NRX be listed on exchanges?**

Yes, NRX is planned to be launched on exchanges in the beginning of 2019.

**12. Do you have a softcap/hardcap?**

The Neironix token sale does not imply a softcap or hardcap. The total amount of all tokens (450,000,000) available for the sale without a discount equals \$45 million, with the maximum discount \$29.25 million.

**13. When will there be the distribution of tokens?**

In one month after the end of the token sale.

**14. Who is eligible for participation in the token sale?**

The citizens of the countries whose legislation does not ban participation in ICOs and who have confirmed their identities (KYC).

**15. Where can I learn more about the platform's functionality?**

You can learn about it on [neironix.io](http://neironix.io) in the FAQ section. Also, some of the functionality and idea of the project are described in our White paper. All the projections and novelties are described in a separate document.

**16. How will the projects be evaluated?**

The evaluation of ICO projects will be produced automatically in real time. Neironix analyses more than 100 dynamic and static factors, takes into account the success story of the projects. The rating is the result of analysis of risk factors in our methodology.

**17. Is NRX token compatible with the ERC20 standard?**

Yes, the token is built on the Ethereum platform and initially supports all ERC20 standards.

**18. How many NRX tokens will be issued?**

The total number of NRX tokens to be issued is 600,000,000 of which 25 % will be left in the smart contract for further distribution.
