Sampling Date:	20.03.2020	sample no:	B #####
Admission:	20.03.2020	USZ Patient Number	#####
Release:	24.03.2020	Patient Case Number	#####
<i>Preliminary Findings:</i>			
Z 2020.4547			

Diagnosis

**B 2020.17493: TUR-B (urinary bladder): a fraction of a non-invasive papillary urothelial carcinoma (low-grade according to WHO 2016, G2).
Separate fragment with tumor-free smooth (detrusor) musculature.
No fraction of tumor distal urothelium.**

TNM staging classification (8th edition): pTa, low grade.

Clinical Data

Known recurrent urothelial carcinoma of the urinary bladder (previously ... in each case low grade) Significance? Stage? Grade? Affected detrusor?

Specifications of the Sample

TUR-B [transurethral resection of bladder]

Macroscopic Findings

Two excised tissue particles: 0.7 x 0.5 x 0.3 cm.
KELME/stasn

Comment

For internal quality assurance reasons, the significance of the findings was confirmed by a second specialist pathologist (Prof. #####).
