Zurich, 14.02.2020

Patient Number: #####

##### , 01.08.1959, #####, 0000 unknown

## Referring Doctor

BALGRIST / #####

**Examination Date:** 14.02.2020 **findings from:** 14.02.2020

## Examination

Lumbar Spine MRI

## Clinical data

Automatically transferred from the electronic application:

*Lumbar pain radiating to the left leg*

*Lumbar radiculopathy*

*Lumbar spine MR*

## Findings

No preliminary examination is available for comparison. The area from partial Th11 to sacral is imaged. No vertical dislocation of vertebral bodies. Dorsal and ventral alignment is preserved. Conus medullaris at S1 level. No nerve compression. No spinal stenosis.

Multi-segmental slight facet joint arthrosis with irritation of right L4/5 and L5/S1 facet joints and to a lesser extent left L4/5. Minimal ventral spondylosis of the lower thoracic spine.

## Assessment

Multi-segmental slight facet-joint arthrosis with irritation of right L4/5 and L5/S1 facet joints and to a lesser extent left L4/5.

No nerve compression.
