# Profit of our partners ●

We use different touch points with our active player base. The most effective tool is letters.

The statistics of one of the partners for several months of work are shown below:

The partner paid for the "**Priority brand promotion**" package for 1,199 euros and **was able to recoup it in 2 weeks** with an average cost recovery in the market of 3 months. After that, he was able to extend the package with a 30% discount for 839 euros.

We have developed complex chains of interaction with players and understand how to motivate them to go to your casino and register. It is important for us that our partner can turn these registrations into deposits, as in the example.

# Our paid packages .
